## **Online Ordering for POS**

### **Internet Ordering for Restaurant Patrons**

In today's restaurant market having a website is a must. Now online ordering has become the new standard that consumers expect. Because it puts them in control of their order, many consumers prefer online ordering to placing orders over the phone. Our software partner, Online Orders Now benefits both the restaurant and the consumer by improving order accuracy and lowering costs.

### **Quick Return on Investment**

Because there are no annual fees or contracts, Online Orders Now is affordable for both franchise and independently owned restaurants. A small monthly fee covers unlimited transactions, all future software upgrades and technical support.

With Online Orders Now restaurants see an immediate increase in volume, larger average ticket sizes, greater market penetration, higher customer satisfaction and lower operating costs.

All marketing data, including cell phone numbers is captured for use in powerful real time response marketing campaigns.

### **Direct POS Integration (or not)**

The order can come directly from the customer from the Internet to your Maitre'D POS System. The tickets print out instantly in the kitchen (or on the kitchen video) they also print on a receipt printer to alert your cashiers. Or you can use Online Orders Now without any integration at all. This is a great option for those customers with one of our lower end products, a competitor product or cash registers. We can add a network printer so you can still get orders to print directly in the kitchen!

### Complete Website Integration

Online Orders Now blends perfectly into any existing website. Your restaurant logo, images colors and fonts are all used to make each of our customers online presence as individual as your restaurant itself.

### Powerful Features

- ✓ Mobile Apps- We build your own mobile application with your restaurant name and logo and place it in the Android and iPhone Marketplace!
- ✓ Themed Menu Building- We pull data from your Maitre'D POS then edit it to match your printed menu.
- ✓ Party Platters Menu- We will build and host your catering menu on a separate link so customers can order separately from the regular online menu.
- ✓ Coupons and Packages- We support any coupon imaginable.
- ✓ Automatic Upsells- You can specify which additional menu items are automatically suggested based on the customer's choices.
- ✓ Geocoded Delivery- For chain accounts we will direct your customer to the correct restaurant location by street instead of zip code.
- ✓ PCI Compliance- OnLine Orders Now will ensure that all customer data is always fully secured.

### Just provide the menu

Online Orders Now use the restaurant's menu details and data from Maitre'D POS to build the integrated online ordering menu. This hassle free process puts restaurants menus online in days, instead of weeks. Why not start today? Call Performance POS for more information.
